

QX3202 32-INCH 4K DISPLAY WITH MULTIPLE INPUTS

FEATURES

- **4x HDMI with Quad-View:** Displays four independent sources on a single screen, enabling efficient multi-source monitoring without external multiviewer hardware.
- **DisplayPort Daisy-Chain:** Mirrors the selected input to a second display, allowing simple signal extension without additional splitters.
- **LAN Control and RS-232 Loop-Through:** Enables centralised configuration and daisy-chain control across multiple displays from one control point.
- **External Keypad Support:** Works with optional keypads to provide fast access to preset functions for improved operational efficiency.
- **Dimming Knob Compatibility:** Supports an external dimming knob for precise, tactile brightness adjustment during critical monitoring tasks.
- **Blackout Mode:** Instantly blanks the screen through the external keypad, helping operators eliminate light spill in dark-room environments.
- **Ultra-Low 2 Nits:** Achieves extremely low brightness while maintaining visibility, reducing eye fatigue during overnight surveillance.
- **Robust Design for 24/7 Operation:** NeoV™ Optical Glass, Anti-Burn-In™ technology, and a reinforced metal chassis ensure long-term durability in demanding control-room conditions.
- **Neovo Controller:** Offers unified software-based management across multiple displays, simplifying setup, monitoring, and batch configuration.

The AG Neovo QX3202 is a 32-inch 4K display purpose-built for environments where precision, control, and uptime are paramount. With 4x HDMI inputs along with native quad-view capabilities, it allows operators to monitor up to four video sources simultaneously in flexible layouts, eliminating the need for external switchers. The display supports remote management via LAN and RS232 loop-through, enabling seamless integration into control room systems. Combined with blackout mode for low-light conditions, industrial-grade durability, and optional custom keypad shortcuts, the display empowers system integrators to simplify installations while ensuring long-term operational stability.
